MONEY MARKET.

WEDNESDAY, May 12-6 P. M. The stock market was moderately active this morning Prices were well sustained; but it will be seen that mos of the transactions were on time. At the first board Reading Railroad declined 1/4 per cent, Canton Company 1/4. Long Island 1/4, New Haven Railroad 1/4. Eric Railroad 34, Ohio Life and Trust 34. Morris Canal advanced 34 per cent, Stonlington 34, Hudson Railroad 34. At the second board, the market remained without change. Reading and Nicaragua were quite active, the former at a slight advance, and the latter at a slight decline Holders are not pressing their stock for sale. In the absence of buyers, they wisely keep their supplies out of the market. Operators are anxiously looking for steemer from California. The Canada from Liverpool brings pretty good news. We shall have her matis to morrow, and shall be better able to judge from the de tailed accounts, what the news amounts to. The Ningare left Boston to-day, for Liverpool, without any specie.

The first mortgage bonds of the Buffalo. Corning, and New York Railroad Company, amounting to \$400.00 will be sold to-day (Thursday) at the Morehants Ex-change. If our capitalists would confine their purchases of railroad bonds to those issued directly by the company secured by a first mortgage, instead of buying county bonds issued to railroad companies, they would be re-Beved from all apprehensions relative to their ultimate

vise than safe investments. The Williamsburg Gas Company have declared a sen

annual dividend of five per cent; the Farmers' Bank, of Hudson, a dividend of seven per cent; the Farmers Bana, or The receipts at the office of the Assistant Treasurer of this port, to-day, amounted to \$68,025 94; payments, \$25,558 34; balance, \$3,583,687 90.

The demand for land warrants has failen off lately-

The supply on the market is daily increasing. We quote

160 aero warrants at \$120; eighty aero warrants, \$65; forty aero warrants, \$32 50.

The Boston Courier says:—Money continues to be in good supply at the banks, and with individual lenders. Handsome commissions are paid to the bill brokers for precuring good business paper at simple interest; and so numerous are these applications that in some instances they have proved really annoying to parties who had already more money on deposit than they could satisfac-torily dispose of. Business generally, has begun to feel the favorable effect of a plethora in the finances, and advanced prices have been obtained for many of the leading

 The discount in California coinage gives a great deal et trouble to business men. It will be seen that all the coin-age of that country is at a discount. We do not see the use of a government assayer unless he preserves the government standard, and issues coin at full value. It is a deception, as the coin is not really what it is represented to be.

The bill to prohibit the circulation, in the State of Ma-ryland, of foreign bank notes under \$5, after the first of on Monday last, rejected by the House of Delegates, for the want of a constitutional majority. It received 28 votes only, to 19 in the negative, and therefore lacked 10 votes of the requisite number. It was, however, reconsidered and laid aside. As no less than twenty-seven members out of seventy-four were absent, or failed to vote, it may be that it will meet with a different fate when the question is again taken up on its passage. The corporations of Georgetown, Alexandria, and

Washington, have, with the banks, raised \$80,000 for the repair of the Chesapeake and Ohio canal, and the work

The total circulation put down against each bank named in the above list, is on all the securities deposited with the Comptroller, of which canal revenue certificates form the per cent given. It will be seen that there is but one bank issuing bills entirely on the security of canal revenue certificates. The bulk of the securities of most of the others, is composed of other stocks. The Comptroller will be compelled, by the recent decision of the Court of Appeals, to call upon these institutions, and require other deposits. This is one of the evils growing out of such hasty and reckiess legislation, but it is by no means the greatest. The contracts made for enlarging and improving the canals will all be repudiated, and all further progress arrested at once. Serious losses to contractors will be the result, and large claims will be broughtagainst the State; and there is very little doubt but that most of them will be recovered. A million of dollars will hardly cover the loss to the State. This, however, is nothing. It is one in the long list of items which have been erented by the course pursued by the unprincipled politicians of the State. It is a wonder we have not been bankrupted long ago. Nothing but our unlimited and almost unexhaustible resources have saved us. Three millions of dollars were added to our public debt, by loaning the State credit to the Eric Railroad Company, most of which was squandered. About ten years ago, large claims were brought against the State, by contractors, for losses sustained in not completing the work commenced on the canals. A large amount was added to the public debt in this way. We shall now have another increase without an equivalent, and it is impossible to tell when and where this extravagance and folly will stop. The Canal revenue loan was, without exception, the boldest piece of political awinding ever conceived, even by Al-bany politicians. It would have done credit to the politicians of Harri-burg, who have, by the acts passed in the Legislature of Pennsylvania, within the past two or three years, shown themselves capable of almost anything in the financial line. The financiering politicians at Albany have, we believe, taken the lend and there is very little doubt but they will keep it. The effect of the decision of the Court of Appeals, upon our securities in Europe, must be of the most unfavorable character. Foreign capitalists may well be cautious how they touch our stocks. The claim against the State represented by these Canal certificates is new merely one of honor and equity It is not legal. There is nothing to be apprehended, for ultimately they will all be provided for, principal and interest; but in the meantime holders will have to go without the interest, for the Comptroller has no authority to

pay a cent. A law authorizing a lean of none millions of dollars for the enlargement and improvement of the New York State canals, could easily have been passed, and approved by the people in a constitutional manner. The people of this State are in favor of the most speedy and most ex-tensive enlargement of these important and productive public works, and if the Legislature had possessed political honesty enough to have introduced a bill in the regu-lar way, and passed it in the regular way, the people would have voted upon it last fall, it would, without doubt, have been adopted, and the loan would have com manded a greater premium in the market than the un constitutional issue which went by the name of "Cana Revenue Certificates. 1 It would have all been arranged and settled, in a legal, legit mately constitutional manner and the enlargement would have been going on at this mo ment much more vigorously than it has at any time under the present administration. The rightway is, after all, the easiest, and politicians of every class and grade will find it so some time during their experience. What course the government will pursue in the premises, is a matter of considerable curiosity. There is, in fact, but one course to pursue; but whether the Governor will remain quiet until the regular meeting of the Legislature, or whether he will call an extra session, and provide for the difficulty at once, or not, is a question of considerable importance t all parties interested. A few days may develope the policy of the government, when we shall be able to enter more fully into the merits of the matter. The politicians in all parts of the State will, in the meantime, be actively

New York Dry Goods Market.

Wednesday, May 12, 1852.

Trade is active. The nearly by and city trade, as well as the Northern and Western, are buying largely. Prices generally show more steadiness, and domestic cotton staples seem disposed to advance. The exports are large, being 18,766 packages since the let of January, against 16,915 for the same period last year. Heavy brown sheetings are in good request, and sell to arrive. The market for all brown goods is very buoyant. Brown drills are firm, at 7½c; bleached sheetings and shirtings are in fair demand and at regular prices. There are no heavy stocks. Osmburgs are in light stock with only a limited demand, at full quotations. Bleached and blue drills are in steady demand, at regular rates. Denims are selling at a slight advance on the auction sales. The supply is low. Stripes and ticks are in moderate request, at steady prices. Frinting cloths are firmer, with a slightly improved demand acting on a reduced supply; prices are improving. Frints are dult; good styles are scarce, but low qualities are pienty, and heavy in price. Ginghams enjoy a regular demand, at the uniform prices during the season of 10½c. Lawns are in much better request, and sell at fair and full prices asked. Delaines are quiet; no new supplies are brought forward, and a demand will soon open for fall styles, to supply distant markets. Cloths are selling moderately at previous low prices. The large stock continues to operate in favor of the buyer. Nothing but a considerable reduction in the supply served to restore strength to prices. Cassimeres are not brisk, but a fair demand is met at full prices. Satinets are active for all qualities; the supply is very much reduced owing to the very protracted activity in those goods. but a fair demand is met at full prices. Satinets are active for all qualities; the supply is very much reduced owing to the very protracted activity in those goods. Prices are very firm. Tweeds are in large stock, and with little demand; prices are heavy. Jeans are rather active at better rates. Auction sales are drawing to a close for the season. The large stocks of French and Continental goods have, by this means, been distributed through the country at very moderate prices not much to the benefit, latterly, of importers. Prices for the balance of stock held are firmer. There is no assortment. Staple silks form the bulk of the stock. Bareges and thin goods are depressed, but black and colored silks, ribbons, fine cotton prints, are all firmer. Woollens are dull but stoody; the lew German cloths still inundate the market, selling steadily at low figures. British goods are firm for staples, and sell moderately in extent. The imports continue light, and neither ships nor steamers arrive home with full freights. The fall importations, however, will be large.

DLEASURE, PLEASURE, PLEASURE.—YONKERS IS
the place te go for pure air and enjeyment, at reasonable prices. The Hudson River railread cars run you up
with lightning speed. This is decidedly the earlest, cheapest
and best managed road in any part of the world. At the New
York, Warren street, station, they have Mr. Levi Fock, who
was Dr. Kellinger's superintendent of his line of stages
during his leng opposition to the Harlem Railroad Company.
The Hudson company have done well in making this selection: Mr. Feck will do his duty. At Yonkers they have
Capit Tuttle as agent—who was formerly one of the most
efficient efficers that ever took charge of a boat upon the
Hudson. Kellinger's Mansion House is open for the season.
There are several other spacions houses; consequently,
visiters will stand a fair chance of being taken care of, so as
to induce them to renew their calls. There is no estaseenery in any other part of the world—it is truly the garden of the universe. Come, and be year own longes.
N. B.—The steamboats run from the foot of Jay street, at a
very low fare.

TO CAPITALISTS.—THE ADVERTISER HAS ACquired, by an article of agreement with the American Stone Dressing Company (owners in fee of Eayrer Patent Stone Dressing Company (owners in fee of Eayrer Patent Stone Dressing Machine), the right of exclusive use of said machine in the city and county of New York, for the whole unexpired term of the patent to December 4, 183). It is claimed by the owners that its capacity is unsurpassed by any other machine in existence, for proparing stone for buildings, canal locks, aqueducts, and bridges. They challenge the world to produce its equal, for expedition and beauty of faish. It is to stone what Woodworth's Planing Machine is to boards, or the saw mill to the rough log. It dresses brown stone, marble, limestone, and granite with equal heauty and case—particularly the brown stone from the Paterson ledge. The stone on the carriage is fed fast or slow at plexure. With a five horse power applied to the machine, the stone will move forward from two to shree feet per minute, and take off from one to two inches of stone, if required, which apparently dulling the chiesis in the least deprese.
